

Hearing for Special Use Permit Application
For Centerline Communication proposed cell tower.

Tuesday October 27th, 2020 @ 7:00 p.m.

The Public Hearing was called to order at 7:00 pm at the South Wales Memorial Building, Emery Road, South Wales, NY.

ROLL CALL: Taken at prior public hearing

Present Supervisor Rickey Venditti
Councilman Donald Butcher
Councilman Dan Driver
Councilman Kyle Barry
Councilman Gerald Klinck

Also Present: Ronald Bennett Town Attorney, GHD Engineering, Building Inspector David Bender, Mike Zywar Highway Superintendent (4) Residents whose names are on file.

This Public Hearing is for the Town of Wales Residents to provide their input to the Town Board on the S.U.P. application received for Centerline Communication proposed cell tower at 12721 Warner Hill Road

Town Clerk to read Notice of Public Hearing as Published.

Supervisor Rickey Venditti stated that this application is for a telecommunication tower for Cingular Wireless at 12721 Warner Hill Road. The proposed tower would be 300'. They have agreed for any future cohabitation with other companies if anybody else needs to use this tower; much the way other towers are in town. This limits the number of towers, by letting the one's we do have, be cohabitated by other businesses that need to. They have agreed to have a bond to remove the tower, if it became obsolete

Invitation for Resident's Public Comment.

Susan Foss 12595 Warner Hill Road. I'm probably the closes to it. I would like to see the application, so I can see where they plan on putting the cell tower. I hear they want to change the spot.

Wondering if this will help the dead spots. I have no objection to the tower being put up.

Christine Wightman of Centerline Communications representative for AT&T. Said at this time, they will be putting the project on hold, for the special use permit at 12721 Warner Hill Rd.

Melissa Koenig 12305 Warner Hill Road- I don't if you know that Senator Blumenthal was speaking to the FCC, to see if anyone would investigate the health effects of this technologies. They have made it, so the cell companies are not liable for any adverse health issues due to this technology. Senator Colbeck testifies against the 5G, because of the reported health effects from wireless technologies at a hearing in 2108. Once installed, they would allow 5G small antennas every 100 meters. I don't want a 5G small cell antennas to be built in our neighborhood. Also, a generator will be there. It is so ugly. We live in a beautiful community. This could affect the property values. Numerous scientific studies have shown harmful effects including, increases in cancer risk, and considerable evidence that RFR may increase neurological disordered reproductive harm, due to oxidate stress.

MOTION# _____ moved Supervisor Rickey Venditti, second by Councilman Gerald, Klinck, to adjourn the public hearing for Centerline Communication at 7:12pm. **CARRIED**

Respectfully submitted,
Town Clerk, Melinda Eaton
